## AUDIO-VISUAL REQUESTS

### Rhonda Hull, Ph.D.

**Rhonda** creates each presentation to meet the needs and match the flavor of each group, so always confirm and review needs as your event draws closer. **Rhonda** makes every effort to give you plenty of time to accommodate her modest needs and is very easy to work with.

Regardless on the size of the group and the setting of the presentation, **Rhonda's** audio-visual needs are usually very basic, with a couple of unusual exceptions, and may include:

- Overhead projector/  
computer projection (Mac)
- Easel/flip chart paper/  
pens
- Lavalier microphone/  
cordless microphone that  
allows freedom to move  
around the room and up  
and down the  
aisles
- A small table for notes/  
props and a glass of water
- Ability to play and amplify  
cassette tapes/CD's if  
needed

- 2 hoola-hoops (Rhonda likes to keep you guessing!)

**Rhonda** has found that classroom or theatre style seating is optimum, although round table seating is workable.

**Rhonda** often includes one or two audience participation exercises to emphasize valuable points that involve the need to have room for movement. Therefore, She prefers to have 6–8 feet of open area between the platform stage and the audience with a center aisle.

If possible, **Rhonda** prefers to have room on the stage platform for at least six people across in a row at arms distance. Please arrange for her to have a few minutes to set up props and place notes before the event begins.
